Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the apparatus with four tension bands must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claims 1-6, and 8-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-6 and 8-27 recite "An apparatus", but there are numerous instances in which the apparatus is defined by "footwear" or parts thereof such as the phrase "configures to engage...an item of footwear at a first location disposed...", "each attachment member being disposed on the item of footwear"(claim 4), etc. which renders the claims vague, indefinite, and confusing as to what elements are being positively recited as part of the claimed invention.

Claims 3, 5, 9, and 11 are functional, indefinite, and incomplete because they recite solely functions and do not recite and further structures and therefore they do not further limit the previous claims and it is not clear what additional structural limitations applicant intends to encompass with such language.

Claim 16 is confusing, vague, and indefinite and it is not clear what disclosed elements applicant is referring to with language such as "tongue".

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-20, 23, 26-34, and 36 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sutherland (4753229), see figure 2.

5. Claims 1-5, 7-14, 16, 17, 19-23, 26-33, and 36 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Johnston (1666290).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 21, 22, 24, 25, 37, and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sutherland in view of Johnston.

Sutherland shows a shoe and method of using the shoe comprising a support foundation (80) with tongues (82, 124, 144, 164), and lateral tension bands (140, 160, and 120) substantially as claimed except for providing medial tension bands. Johnston teaches providing medial tension bands (see lines 95-98) to provide support for the medial side of the foot. It would have been obvious to provide medial tension bands as taught by Johnston in the shoe and method of Sutherland to increase support for the medial portion as well as the lateral.

8. Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sutherland in view of Broadhurst (4982733).

Sutherland shows a shoe and method of using substantially as claimed except for the use of buckles to secure the ends of the bands. Broadhurst teaches the use of

Art Unit: 3728

buckles (82) for securing bands. It would have been obvious to use buckles as taught by Broadhurst in the shoe of Sutherland to provide a more secure means for securing the ends of the bands.
